

What's Happening in the World? October 23, 2022 Vlogcast with Daniel Giamario

[Turning of the Ages Mystery School](#)

1.88K subscribers 227 views Oct 24, 2022

This month Daniel is joined by TOTAMS Managing Director, Awen Labow, to discuss world affairs, in light of the more than remarkable astrological happenings of the next month. Included in the discussion are: The US Election, The Eclipses, Venus in the Underworld and Mars Retrograde, Numerous charts of countries and world figures including: - The Ukraine - The European Union - NATO - United States - Russia - Joe Biden - Vladimir Putin - Zelenskyy - Elon Musk... All explored from the framework of the TOTAMS astrological paradigm. Not to be missed!

...to everyone's attention are a lot of things that have to do with what's happening in the world from the vantage point of living outside of the country. Now for a long time it becomes ever-more apparent and evident that what people see is the news in the United States, unless they have a lot of time on their hands to do research, which many people don't, I find myself in a position where I can research a lot, which is just such a pleasure, having a Capricorn Moon *because* I just love researching, So I'm going to be bringing a bunch of stuff to your attention that you might NOT be aware of, that fit into what is

happening over these next weeks, over this next month. In fact, what I want to start with is the Eclipse season, which is happening really soon. The soul that we're moving into, the Eclipse season at the new moon. So I would like to start by having a little bit as on tuning into the Eclipse season, and then we'll take it from there. So I want to let you put up the Eclipse chart for new moon

One thing that has been a specialty of our school for many years now, is the whole understanding of Eclipse seasons of which there are two every year. Now occasionally there are three Eclipses in an Eclipse season, and then it's a slightly longer Eclipse season, but the ones this year have only had the usual number, two in each Eclipse season, and so here we have the partial Solar Eclipse that will be actually almost full. I mean it's at a 0.862 where 1.0 is the edge of totality. It will not be visible in the United States or anywhere on Mexico, Canada, South America, and like that, but before we take a look at the Eclipse path, I just wanted to point out a few important items here. Notice where the nodal axis is 13° Scorpio - 13° Taurus, and its relationship with the Sun and the Moon and Venus. And certainly one of the great features important features of this Eclipse would be the fact that the Sun and Venus are so close together there. I actually did a TV-show interview yesterday, where a lot of focus was placed on that Saturn-Venus conjunction on the other side of the Sun, and of our Sun and our view, that's Venus in

the Underworld. So that's kind of like plutonium, and then, we have the Venus position close to the South Node, but just remember, these degrees as we go forward, a 2-degree Scorpio Sun, and then the Nodal Axis at 13° Taurus 13° Scorpio.

Let's take a quick look at the Eclipse path, so you get us. This will fit into what we'll be discussing as we go through here. So as you'll see here the partial, almost-full Eclipse is going through Central Russia, and it will extend down through Kazakhstan, Alma, well a little tiny bit into Uzbekistan. But you'll see that also that it stretches, the partial part of it, will stretch down into the Ukraine. Actually, there its a partial in Kiev and Kharkov, and those places. So we could say this is the Russian-Central Russian partial Eclipse that is happening. And just keep that in mind as we go through some of the other stuff we're going to be talking about here. We may come back to this if we need to, so let's look at the total Lunar Eclipse.

Let's first take a look at the chart of that and notice again, where the nodes are, and what the degrees are of Mercury and the Sun. Actually that, of course, I think most everybody is aware that that Eclipse is happening on U.S election day. I saw some research that there's never been a total Eclipse on the U.S election day and the nodal axis is still in the same place. If you want to look at the other aspects of this, we're still in that final sort of the latter remnants of the last nearly exact Saturn-Uranus square, which Saturn definitely is making a play

here toward the nodal axis. So just keep in mind those degrees, and this is a particularly long, total Lunar Eclipse. And well, one of the things I wanted to mention is that with all the charts that we're going to be looking through, the slides that we prepared for this will be a very handy reference for anyone who wants to do further research on the topics I'm going to be bringing up here. And, as we look at the variety of different horoscopes, that I thought it would be really important to start with the Eclipse charts since that's probably the most important thing on people's minds right now.

Our newsletter that's going out tomorrow actually has an article on a video from Eric about this Scorpio-New Moon Solar Eclipse and we've been talking about this, although way back through the year, you know, that you can actually reference some of the other presentations we've done during Solstice and Equinox events. And I think there's even a video blog on the subject. And those are all referenced now on our new website, I think, quite well. There's a whole table of contents for the video blogs, and also, you can see all the Equinox and Solstice event, seminar events, seminars all the way back to I think it's all the way back to 2018. Now I think they're up there. Is that right?

A - I think so yeah at least back that far yeah

D - Now, let's take a look at the pathway of this, where it will be total. So the entirety of large

portions, again of Russia on Eastern Russia. Eastern Russia through the Pacific, totaled in New Zealand. We're actually, going to have totality where we live here, I'm in the Philippines. Hawaii gets a marvelous experience of it, and you can see the line of totality does cut through the U.S. And you're going to be able to have a totality experience there, and in Bisbee. And you know people in the west coast, people in Arizona on the western part of the U.S., we'll have a a ringside seat for this. You know usually about half the world will have some percentage of the Eclipse, but this is, what you're seeing here, is where it will be absolute, will be totaled. Now as I mentioned, this is a particularly long one: five hours and 54 minutes, including the partial, you know like where the Moon will start to shrink down to totality. And the totality is one hour and 50, one hour and 25 minutes. So that's a pretty long portal and then, there'll be another few hours as the New Moon will be seen like a New Moon, I mean no Moon, and then, it'll be a tiny little crescent and then it'll come all the way back to full. So you have in that five hour and 54-minute time period, really a tremendous time period to do ceremony, to tune in in the variety of ways you like to do that. We have a suggested framework for that, which is in the time frame prior to the portal of totality, as the Moon is shrinking, as being a very good time, whether you have anything personal on your chart or not to consider, and having the courage to bring up where the shadow material, the hidden material relative to the Mystery

Schools of Taurus and Scorpio have been, let's say in the last, we can speak maybe back 10,000 years, back to the Younger Dryst. It's pretty speculative beyond that, but where have the shadow of these Mystery Schools been. And our talk here today is beyond the scope of going into that in greater depth. I would suggest the previous, again the previous seminars, and also the video blogs that we've done on the evolution of the Mystery Schools and the shadow of the Mystery Schools, but then of course, if you have something important on your own chart that are near the degrees that where the Nodal Axis degrees are, and where the degrees of the Sun and the Moon are, then you can work with your own material on that. And then, as you go into the portal of totality, that's really a time to receive, to just go into spaciousness and you know, be within yourself and to receive transmissions, because it is, it really is a portal. One of the things we've been working on recently is considering the difference between the experience of the day of the total Lunar Eclipse, when you don't see it. You know, where the Sun is shining completely through and that area of the world, And then, where it's blocked. You know in the area of the world, half the world is getting a total or partial Lunar Eclipse and we're just kind of tuning into that stuff right now. Then there's the other issue about the importance, you know, things like, how long does the Eclipse affect last. And I don't know of a conclusive answer to that... I'm thinking of at least three years, maybe if it's a really

important one. You look at the Lucero sonnet, the 18, slightly past 18-year cycle on it, and then also where in the world does the path of a partial or a total Solar Eclipse happen? And then, where does it occur? What part of the world for a total Lunar Eclipse? And this is why we shared with you here, the pathways, you know, because I think it's significant that the nearly total Solar is passing through Central Russia, down through Kazakhstan and Uzbekistan, that used to be part of the Soviet Union.

Now there's another factor, something I've only just recently discovered. Now there could be people listening to this that already knew this, but I never encountered it before, which is that if you take five, 18.6-year Nodal cycles, that actually after five, it comes back to the starting point on any given date. It's a 93-year cycle. Now it's just, having discovered this reason, becoming aware of this. I didn't discover it, becoming aware of it recently, I think it does have some relationship to our timeline-material, which is around 90, three Saturn Returns, the Saculum, the whole thing on the whole timeline philosophy that we have. And now we have something else, the return of the Nodal Axis to where it started from. So, I want to illustrate this by something that can come into our speculations today, which is a 1929 chart, which is the chart Black Thursday of the Stock Market Crash.

When you look up "stock market crash," they'll give you dates from

the 24th to the 29th of October. This is the one of the so-called "Black Thursday." And you will notice, look at the Nodal Axis, 12° 12", I mean and having this whole time frame is exactly the return, really of you know, give or take through the weeks, you know I mean so it's hard to specify one exact precise date, but it's in that Eclipse Zone. The Nodal-Axis Zone. And if you look back 18.6 years, and then a previous 18.6 years, it doesn't come out to the date of the starting point. So it's kind of like a synodic return of the nodal axis to back to a starting point, and this happens, it's with CC. just so happens 1929 was 93 years, right. So I look at that, actually some of the same Eclipses were happening during that time period. It's not the same Saros, it's not the same Eclipse families, but it certainly is the same nodal-axis family, and you'll see some of the other factors that were happening around that time. You know, Pluto conjunct the Cancer Moon and then, also you'll see the Mars in Scorpio position, and the Sun at 0° Scorpio. You know all of these and Chiron at 12° Taurus, you know. So I'm just pointing out the these degrees of the zodiac that should capture our attention. So I wouldn't be looking at this chart from the perspective of the angles of the chart, because that depends on what time you use, what specific date you use. But what I'm highlighting here is the Nodal Axis and that 93-year cycle. And while I'm not in any way here doing any prediction work here, and our school doesn't do prediction, we just try to tune into what the intent of a

certain time frame is. And there's a great number of alternative websites that talk about, looking at it from the perspective of what happened in 1929. Will there'll be another stock market crash? But I would like, not necessarily, what I would suspect is though this is symbolic of the huge run-up now to a digital monetary system, and the elimination of cash in many places, and the so-called I won't call it great, what is called "the Great Reset." And like the development of a completely new approach to how the world does money. And again, these are just some things to consider, based on this 93-year cycle and the position of that – you can see here of the Nodal Axis.

So why don't we shift, to look we've seen this many times on previous presentations, the U.S chart.

A - Can I just ask you Daniel to clarify the 93-year cycle is not the only time that the Nodes are in Scorpio and Taurus, but that they're in Scorpio Taurus, and Sun is at the same degree?

D - They're back to the starting point of any given date You know, so in our school, the definition of the synodic cycle, is the relationship between the planet, or in this case the nodal degree, the North Node relative to the Sun, you know. I mean, so it's relative to the Sun because we're taking it back to the same, this the same day and year, or roughly, the same day and year. Like if I could share to make it more clear, there can be a zodiacal Venus return. I'm just using Venus as an

example, every year. But a true synodic Venus return is only every eight years, because if you look at where Venus comes back to like say a starting point, at its degree, it's not happening at the same season. It jumps around all over the place. So when it when you have a true synodic planetary return, or in this case a Nodal synodic return, it's zeroing in on a specific starting date. So looking at the, if you're going to say, "Well what is, what was the birth chart of the stock-market crash?" Well then, that's based on, that's like a solar, that's where the Sun was right? I mean, and so then, it's when, you have to wait 93 years for it to come back to that same area on that same date. And does that help?

A- Yes. Got it. Thank you.

D - Thank you for having a chance to further clarify that. It's important because there could be a confusion out there. Or like, I won't say confusion, but just coming up with a different way of understanding these things, that so other astrologers might say, "I'm having a Venus return next month." You know, which just simply means that Venus is back to their original zodiacal degree. But, it won't, if it's not happening anywhere near the birthday, then you do not have the recreation of the original Sun-Venus angle, which was the original set of instructions. So, this is like the original set of instructions of whatever that stock-market crash was about, whatever version of it you want to understand. Which you know, was it at the conspiracy the

bankers? You know, there's so many ways you can look at that. It was a, it went into another kind of reset that was happening as we went through the Great Depression, beyond the speculation here at this moment around that. We actually have talked about that before, the bifurcation the "what happened in the '30s?", the different choices that the world made then, that culminated in the choices made right after World War II.

So, let's take a look next at the U.S chart, which we've looked at many times, and keeping in mind some of the degrees that we've looked at there is an interesting. Of course relationship, oh here we go, yeah, here's the one I use, the Rudhyarian, Dane Rudhyar's rectification of it. Not every astrologer uses this chart, but it's the one that I find that I work with and that I find works really well. And while you're not really seeing the Taurus-Scorpio degrees showing up here, I want by looking at the U.S chart here, I want to bring in two other important, three other important features that will show up as we go through the rest of the charts we're going to look at. Notice the Moon 27° Aquarius. Notice of course the amazing, well look at Pluto, of course. So we're coming into the third exact Pluto return to the natal chart. And so keep in mind that zone 26-27-degree Capricorn. I mean today's we speak Pluto is around 26°, I think it's 26° 08", 26° 09" Capricorn. And then also, the other thing to keep in mind, with reference to the U.S chart, would be the Mars position 21° Gemini. I've

written and spoken extensively on that position, the square to Neptune at 22° Taurus. And we're coming to the end of the U.S Neptune opposition here, right around, pretty much around the same time as the end of the Pluto return to the natal Pluto position. So keep in mind, the Taurus-Scorpio axis we talked about, and then also, this Aquarius Moon, and then the 26-27° you know, the Pluto position on the U.S. chart, and Mars in Gemini as we move forward.

So the next chart that I think it would be useful to put up would be the chart of the European Union, 1993 November 1st. Now one of the things that you can't help but miss by looking at this chart is that the European Union is in their Saturn Return, 23 degrees Aquarius. Think of that in relationship to the U.S Moon, but it's a Saturn Return, and apply what we know about Saturn Returns to what we know about it on an individual chart. And now, we're applying it to that grand experiment called "the European Union." But then, look elsewhere here. Look down at the Sun and Mercury and Mars, even the IC, and this is actually a recognized time. I'm not quite sure why they did that, they determined it this way. But this is what shows up in all the documentation 12:01 am on November 1st. So we have the Eclipse coming up in you know, the new Moon right on the Midheaven and the IC, which I find very very interesting, as well as the activation of all those other Scorpio degrees that you can see there.

You're not going to find this information from the mainstream media in the U.S. But again, from the vantage point of looking at other news sources, and not necessarily the Philippines, the Philippines uses U.S news sources, but you can actually look at other sites, other alternative ways of looking what's happening in Europe. And it's a great deal of speculation based on different elections that have happened in the countries of the EU as well as the economic disaster that has become a good portion of that part of Europe. The decisions made by the leadership, most of which unelected of the EU, that the breakup of the EU. You know basically that the project may in fact be over. And if we look at the Eclipses relative to this chart and if you look at the Saturn return aspect, it's got to change its mission-and-purpose statement, I would think. And rather than, maybe it started out with certain degree of idealism, maybe not, there's many different views on that. But this is certainly a critical turning point here, for the European Union using the clues associated from Shamanic Astrology and the TOTAMS astrological paradigm, the storyline is the Leo job in the Leo tribe. Now could this actually be the shadow of that you know? We are, the main leader of the EU came out recently and they basically said something, I don't know IF you ever, it's an amazing interview they had with him, where he said that the EU is the garden, and the rest of the world is the jungle, and our job is to attend the garden. Which is to me like a rather elitist and neocolonial,

statement coming from the head of this body. So fascinating, just keep those things in mind, *because* you probably NOT have heard some of this stuff.

All right, let's next look at the chart of NATO. **April 4th, 1949**. Now to me, what got my attention here, was the Gemini Moon, and the relationship of that with the U.S. Mars in Gemini. Also you'll note that there's that Jupiter position at 29° Capricorn, which actually could be thought of as a really nice link with the . . . Well, let me reframe that, it's really close to the U.S Pluto. And also, the Virgo ascendant, it does have a relationship with the U.S. Neptune-Mars square. We do NOT see here, the relationship between the Taurus-Scorpio axis, BUT the Eclipses of next year and the Nodal Axis is going to go into Libra-Aries next year. We'll certainly have a lot of things to talk about regarding that, but I think there's a great deal to *unpack* here in looking at this chart, relative to the difference between the original purpose of NATO, which was the Defense Pact, and then, turning into basically an aggressive force Mars in Aries, Venus and Sun, that's Mars in the Underworld, Venus in the Underworld in Aries. So it's actually become also, kind of a neocolonial imperialist kind of body that wants to add more and more and more countries, which is never part of their original charter. So this is the 73rd year of NATO. So this is just another thing that I'm just really suggesting people to who are interested in world events, what's happening in the world right now,

within the context of so many of the other things we've talked about regarding the Great Turning of the Ages, the convergence of six different timelines in these next *few* years, to keep in mind. What this chart is, and what its intent is, and there we have that Gemini Moon situation right as well as it being a very much the chart, which is quite warlike, you know, Mars, Venus, Sun in Aries IN the Underworld. So to me, that's even, it mirrors actually, does it NOT, the Sun-Venus conjunction that is currently happening. So, I hadn't actually put that piece together. So we have Sun-Venus *conjunct* that just occurred and now, here's Sun-Venus conjunct on that Natal chart, with Sun-Venus and Mars in the Underworld.

A - So I'm also noticing this looks like an out-of-bounds Moon, isn't it?

D - Can you immediately... it could be, I mean, Yeah, well let's see, yes in 1949, it certainly would be, good catch. Yeah, I think that would be quite out-of-bounds. Are you able to tell *immediately*? Do you have your program up?

A - Yeah it looks like 27°, almost 28°.

D - Yeah, that's nearly the extreme out-of-bounds of the Moon, very interesting. And so, that's unassimilable wild-card behavior of Gemini, how about that! And then, you have the Aries in the Underworld at the same time. My hope, would be that they're able to actually come up with some more

creative thinking, than WHAT they appear to be doing. All right, appear to be doing, I can't say that I know for sure, WHAT they're ALL actually doing. I'm just presenting to you the astrological data here, for you to take it, take it from here. I certainly have my own views on this, BUT I'm trying to strictly go by the astrology and what I know about history. Okay, so maybe the next thing, the next interesting one to look at would be the chart of the Ukraine.

So, THIS is on **April 24th, 1991**. And this is the birth time of it, that is generally used by all the places I looked up. And you can see the Mars in Virgo for example, that is much involved with the thing we brought up before, from the U.S. Mars square Neptune. Neptune *opposing* Neptune. But certainly, there's two other things even more remarkable than that. Look at the Moon position, 22° 39" Aquarius, Saturn *conjunct* the Aquarius Moon. And then, that Moon position is nearly the same degree as the Aquarian, well the U.S Moon and Aquarius, and then the Aquarius Saturn Aquarius position on the chart of EU. So I mean that's pretty stunning, that situation. But something even more interesting, look at the degree of the ascendant with Saturn 26° 06" Capricorn, Pluto on Capricorn rising. And again, I have been doing a great deal of research into Russian and Ukrainian history. My wife is *always* amazed that I'm spending so much time on that, and said, "Hey Daniel look up your relocation chart, you know and it turns out that my Capricorn Moon is right on the

ascendant, all through the Ukraine. And it's dead exact in Odessa, which was always part of Russia. The Pluto on Capricorn rising. Well, what is our interpretation of that? You know **Pluto** is *always* about composting. And so you could also make an interpretation astrologically here, that the dismemberment of Ukraine is in front of us actually. You know basically, Poland wants a piece of it, the Belarus wants a piece of it, the Russian-speaking area of the Ukraine, which actually even includes Kiev. They ALL speak Russian, you know and that government in 2014, decided to NOT teach Russian in the schools anymore. You know and in some of the outer provinces that are mainly all Russian, those people are discriminated against. So there's a that's a very challenging chart. And just pointing that out. And then meanwhile, look at Pluto itself 17° Scorpio right. There's that Taurus-Scorpio axis coming into play again, I don't know how you can ignore these features.

By the way, I say “the Ukraine,” because Ukraine means borderland And all throughout history, for about a 200-year period, the one of the Golden Era times of Russia was when Kiev was the capital, before it moved up to Moscow. And also historically, Poland has had pieces of it; also Polaris has had pieces of it, actually Moldava, which wasn't even a country back then. You know, it has this Russian presence there. I don't know, I just look at that chart. I don't know how you can avoid looking at that, and saying there's a lot of composting, this is happening. And then you

have the Moon in Aquarius, which happens to be *conjunct* the Saturn return of the EU. And then, HOW can you avoid looking at that Pluto degree at 17° Scorpio, which is right in the Eclipse window, at this time period. This is a lot to look at and unpack there. I don't know HOW you can avoid some of the stuff. I'm just simply using the techniques and tools of our astrological paradigm in order to unpack this, and to see the connection between this chart and in the EU and the cycles, it's going through and even the Mars position, the Neptune configuration with Mars.

The next one I want to look at, that could be of interest is the chart of Russia or at least, one of the charts of Russia, which is often used. This is from, you know following the breakup of the Soviet Union. And I have it, I think THIS is the one that is used by Putin, I'm not 100% certain, but I've been looking at this one, a fair amount. And here you see Venus and Pluto *conjunct* in Scorpio. So that's in that sort of same Nodal Zone, right. They already went through their Saturn Return, 5° Aquarius, Virgo-Moon, Jupiter in Virgo, Leo Rising with Chiron. There's NOT a huge amount relative to our theme, BUT we might see some *other* things WHEN we look at Putin's chart, and Biden's chart. I do intend to be doing more research ON what probably the astrologers of Russia are using here. And there are so many. I mean, there's a tremendous interest in the occult, and the esoteric in Russia at this particular time. In my own research and reading about Russia

not only have I come upon what Steiner had to say about Russia. But it turns out Edgar Casey, and even DK and the Tibetan, in their readings, when they were asked about Russia, they said that actually Russia is “the hope of the world” to get through the time period of “the war of all against all,” which is how Steiner put it. And they are completely re-embrace their Orthodox Christianity, and much to the chagrin of the Roman Church. There's actually, for those who want to do any additional research on this, there's the writings of Steiner about Russia. BUT also, a book called, “The Return of Holy Russia,” by Gary Lakshman. His books are just really pretty amazing, he actually is in the Rock and Roll Hall of Fame, as a member of Blondie. But since then he's just been a researcher, and he's written a biographies of Steiner, and Blavatsky and he's quite erudite, quite a fan connection too with Colin Wilson, and ALL of that body of work of the esoteric and the occult. The book even has a chapter on the something that in our school has been a feature of our work, which is what the women's fertility cycle based on astrology, which was the kind of stuff that came from Czechoslovakia back in the early '70s. And this is ALL embraced actually by so many of we can say, “the esoteric underground,” which is NOT so much underground in Russia anymore, the far more connection to that stuff than people realize. So you have this chart now, for reference.

And now, I thought it would be interesting to look at Putin and Biden. So here we have Vladimir Putin. And what I've in my own research about Putin, he's strongly identifies with the Vladimir, the Great. Prince Vladimir the Great, who was the ruler of Kiev, when the whole dream of Russia actually came together. And here we, look at, look just look at WHAT we got going on here, Venus in Scorpio, Scorpio Rising, the Eclipses *exactly*. Look, I mean, it's just amazing. Even the Solar Eclipse on the new Moon, we've got the 3 degree Scorpio and 3 degree Taurus on the descendant. And also, you'll notice the South Node, with the IC at 19° 21” Aquarius. And yet, Pluto Midheaven South Node. And WHY am I pointing that out? Because it's the connections between that and the chart, we looked at of the EU, and the U.S. chart. Where the Moon-North Node, Moon South Node, Moon-IC connecting. Scorpio Rising, chart born in that interesting 1952 time of when Neptune and Saturn were conjunct, very close to his Libra Sun, Mercury in Libra. And I must say for him, that compared to the leaders of the West, he's schooled in history and quite articulate, actually. Unfortunately his speeches never come across on the mainstream media in the U.S. I've seen the translations of them, and just runs rings around the NeoCon leaders of the U.S. It's worth checking, and I'm not taking sides on this I'm just saying here, “Look at the chart *because* there's actually, the other factor, which is Gemini Moon. And the Gemini Moon issue is quite intriguing because of the

fact that two of these previous, in fact is they're still out there. Obama Gemini Moon, John Kerry, who leads the whole Green Agenda aspect of the Great Reset, they're all Gemini Moons. So where is he really coming from? Well, the Gemini Moon and Scorpio Rising, who knows? And maybe, he can shape-shift in many different ways. But a lot of people in America do not know is that actually in the Kremlin, he's the moderate. Basically the Russians in Ukraine had wanted him to intervene for eight years after they blew up the Minsk agreement. But he's been *actually*, a far more tolerant actually of hoping they would come to their senses, until the events of the last week and he's kind of ran out of patience, actually. To really get a sense of what might be happening and what is going on over there. Looking, I just advise people looking at all sides and not just the Western mainstream media. Now with this, chart in mind, Venus actually, along the timeline... let me just bring this out for further consideration and research, he is what is that? He's just turned 70. So he's also about to go into his Jupiter return and Venus return. So that's sort of the along the timeline that *double* jackpot, the Venus Return and Jupiter return will be happening at the same time for him next year. And that's a considerably different set of conditions along the timeline than the next one we'll look at which is Joe Biden: Venus, Sun, Mercury, Mars. Venus, in the Underworld, there's that signature again, pretty amazing. Sag Rising and then, you can imagine, the connections between Biden and

Putin in those Scorpio areas. The *other* thing to consider when looking at this guy's chart, is that he is in his Mars Return. He will be turning 80, and when the new Mars cycle, begins in early December, he will have completed his Mars Return-a Mar's Return in Scorpio. And then, we also find other factors here, there's the Moon at 0° Taurus. Well there's that same connected to the same Nodal Axis, the same Eclipse season, all of these things, I think should be taken into account whether you believe that Joe Biden, even still, IF you know IF like whether he's making any decisions OR not. I mean you can still look at the chart and get a sense of what's probably happened to this guy and his like his Mars return. There's also, most people know that have been following this, there's a lot of secrets in this guy's background, and his family's background. And you can then combine this chart with the Ukraine, and the whole drama that we've set up here, by looking at ALL the main charts of the players on the world stage at this point.

I will say here, before we complete this inquiry, that this has been very much a Middle-World investigation, topical, looking at the charts. So what apparently is happening on the world stage. Those that are listening to this with different views can say, may say how can we tell what's really happening? Well you certainly can't IF you just follow the MSM Main Street Media. You can follow as many sources as you want IF this stuff interests you, but we're certainly talking about now, Middle

World and in many respects
Underworld, Lower World
considerations, which has to come
up when you look at the Scorpio
Taurus axis. And then also, you saw
the configurations on Pluto on the
Ukraine chart on the ascendant,
and U.S, and their Pluto Return and
so on. We do also value very much
the Upper World, And we look at all,
these things in it, from a three-
worlds approach. So, from a
Celestial perspective, from an Upper
World perspective, there is that view
that the Universe is unfolding as it
should, that Gaia is handling it, or
the Sun is handling it, Great
Mystery is handling it, the unfolding
is happening, just as it should. I do
think though that in order to have a
valid authentic approach to the
Upper World and to take that into
account, having an awareness of the
Middle and the Underworld is also
important. We can't be in denial
about it, and taking into account
the actual situation or the end of
Kali Yuga, the Fourth Turning,
Processional Cycles, the beginning
of the Sixth Sun, the Sixth Mass
extinction. All these things, we've
talked about in *other* presentations
but a lot of times if you just follow
the MSM, you don't even know
about all of this other stuff. So I'm
just bringing it to your attention for
consideration. Just as one last little
thing of interest, because he's been
in the news a lot, particularly with
reference to Russia and Ukraine, is
that enigmatic figure, the cool
billionaire, Elon Musk. And I think,
we have on his chart to look at here,
too. And to me, he is the epitome of
the Mars Aquarian. You know that
but also Gemini rising and so,

what? Where does he really stand
what's really going on with him? You
know, what's going on with that
Twitter situation? And who actually
even cares because since Twitter is
such a controlled platform, what is
he doing with the technology, he
basically, there's a lot of Elon Musk
Fanboys out there, but he nobody's
pushing more of the implantable
chip in the brain and the Starlinks
and the 5G, and the 6G and
everything else. So, I think he's a
very tricky figure and the Gemini
Venus, and Gemini Rising is quite
interesting. I think we forgot, did we
not? We forgot to look at Zielinski's
chart, the other Vladimir, and of
course, the thing I find so stunning
about THIS is using the tools of the
TOTAMS Paradigm, Gemini Rising
21° Gemini, which just happens to
be the exact *same* degree as the U.S.
Mars, and Leo Moon, Mars in Leo,
the Aquarius Job in the Leo Tribe
for his lineage and Current Life
Purpose, the Leo Job in the Gemini
Tribe. And then plus, we have look
there it is again, Sun conjunct
Venus in the Underworld. How
many times have we seen that
signature? I think it's the fourth
time regarding these charts we've
looked at and remember that's
what's happening right now, and
we'll still be in the Underworld at
the time of the U.S election.

If I saw, using the tools of the
Shamanic Astrology or the TOTEMS
astrological paradigm, this is the
perfect chart of an actor and a
clown, which is essentially what his
profession has been until he was
turned into this apparent
Churchillian heroic figure far from

it. Those, most of what you see in his speeches are a screenshot a green screen, shares you know in the studio somewhere is. He even there, he might be in his in his multi-million-dollar home in Florida He's more somewhere with his great residence in the UK, actually he's rented out his palatial Chalet in Italy to Russians. Actually, these are all things you're not going to know if you just follow the MSM. So, take a look at that chart also, because I think it fits in perfectly into the whole thing and I've even in other time period said that he would do well to actually retire to one of those places because I don't know whether he is going to have it much future in continuing to play out the acting role that he's currently been in. So, it's just some things, some alternate views on this. And that's one of the things I like to do.

So here you have the charts, you can come up with your own conclusions. You know, research it and then, don't take anything to be true, and come to your own conclusions. But how can you come to your own conclusions if you don't see the information in the data? So, anyway if this sparks inquiry and interest and further research, then may it be so. And these next few weeks are going to be off-the-scales as far as world events. Whether it's Middle-World, whether it's the economics, the digital dollar. I don't know if... I think it'll be a stock-market crash, but there'll be something probably even more significant taking place here during this Eclipse window. So any thought

final thoughts Awen from what we've gone through here.

A – No, I just want to thank you for tuning everybody into what may be ahead here. It seems like it'll be, if nothing less than an exciting time

D - Oh my goodness yeah, it's, and but it's really, if impacting people it's not just a spectacle. This is not just for entertainment. I mean this this stuff is really, super serious as far as what happens to Global Humanity moving forward. And just to be very clear here, I am not a Russia Fanboy. In fact, there's a lot of shadow going on there too, regarding the injections and they're down with the financial Global reset as much as anyone. So just trying to give different views about what actually may be going on here. I believe it was Joe Biden in one of his Scorpio tantrums said, “There is a New World Order, and we must lead it.” And so it seems to be that's how the EU and NATO is working together with whoever's running the American government right now, to try to make sure that happens.

A - I know you mentioned some ways of working with the Lunar Eclipse coming up and being that this seems to be the Eclipse season is always sort of a spark, as we're pointing out in in the charts of individuals, is there any further Insight that you'd like to share with how individuals, who aren't world leaders can use this as a spark for maybe bringing about the things that they would like to see in the world?

D - You mean how to work with the solar return the solar Eclipse?

A - Yeah and then Eclipses in general or this whole season being that as a Scorpio Taurus season. It feels pretty powerful.

D - It's pretty much the same kind of framework that I was suggesting for how to work with the total Lunar Eclipse to make sure that you do put attention on those times, working with Solar Eclipse. There's stuff that you can actually, tune in in the time period *before* the maximum partial. I mean the whole process is a couple of hours, you know, when the Sun starts to darken, and then it will go to the maximum point, and then when it goes back to the full Sun as it were. I mean those are all windows of time, portals, where you can work on this personally and collectively. They're portals of possibilities, and there's a little difference, there's a bit of a difference between whether the Eclipse is a North-Node Eclipse or a South-Node Eclipse, but they both involve having to honestly deal with where the shadow material is both personally or collectively. And then, when that clears out, then you're way more open to receive the transmissions that are coming from Great Mystery, from Crystal Sophia from Gaia from the Solar deities, you know, the Upper World, Celestial World forces of good that are there also. So they're not to be ignored, not to be taken lightly or these portals And so there's the personal way we can work with it. And then, there's I mean those of you who follow this type of

astrology, we have a very important part to play. I kind of follow Steiner's view, which is that if you just had 50 or 60 people in a Mystery School, you can actually change the world. You know, I mean if you have that focused will in order to create, I mean who knows what Great Mystery really has in mind. Maybe this is the end of history, the end of the great grand experiment, the end of Kali Yuga. However, if our hearts are open and if we're authentic, really human, what a human being was intended to be, not what is sometimes called "human nature." But you know the genuine human nature of open-heartedness, we can create a prime Earth again. We can you know create a new world in the way that people can love each other and be compassionate toward each other You know so that's the work of our school, to help develop that, to add to that, to contribute it too. That many other groups are too, we're not the only ones, but we're working the astrological mysteries and the astronomical mysteries, this way right.

A - Beautiful thank you

D - So what's coming up next is we have our group mentoring next, the next over this next week. We have the members call coming up actually for Europeans too, well you're not going to be seeing this before then. The day we're doing this is coming up for me tonight. So I hope to see some of you there on the zoom calls coming up. Thank you Awen for helping me with this, your help in the school and helping me

do these kinds of presentations is invaluable. So until next month, we'll do another one next month and who knows, who knows what will have happened between now and then. So till then, see you all.

A – okay, all right, take care.
