SPECIAL NOTE ABOUT PLUTO AND THE TIMELINE

Because of Pluto's eccentric orbit, the Pluto Square and Opposition, which are equally important along the Shamanic Timeline, show up with some degree of variability.

PLUTO SQUARE

This can occur as early as late age 35, or in our generations, well into our forties. Where it falls can strongly impact the other cycles that could be occurring at the same time. In even earlier times it could happen as late as age 65!

PLUTO OPPOSITION

As a historical average, this would be age 124! But in our times, for most of us, it will fall in our eighties. Therefore, where it takes place will also strongly modify the experience of the other timeline cycles in our eighties.
